# My Skincare Routine.

Hello everyone, many of us have been into skincare lately and on this post, I am going to show you my favorite skincare products that I use on a daily basis. My skincare routine is based on the “10 step Korean skincare routine,” but I have personalized these steps to what works for me.

Disclaimer, these products might not work for your skin type it is best if you know what type of skin you have before purchasing any products.

The first product is micellar water, I use the “Garnier Skin Active” micellar water. It removes my eye makeup very well and also my foundation. There are different formulas of this product so you can choose whichever goes best for your

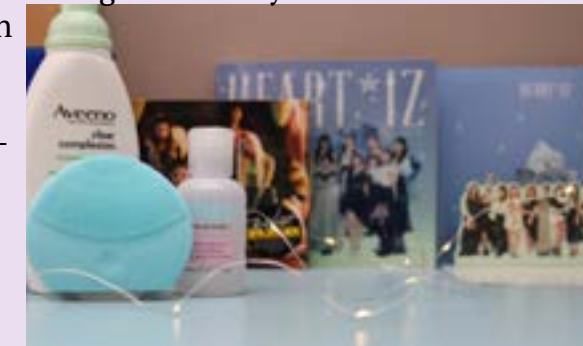

skin.

Moving on to cleanser, I use two different cleansers. The first cleanser is the “Bliss make up melt,” it is important to use an oil-based cleanser or a cleanser that can melt makeup very well. The other cleanser that I used after the make-up melt one is the “Aveeno clear complexion” I use this cleanser with my “Foreo mini luna 2,” this device massages my face and also the vibra-

tion helps to get in every pore and make sure that it removes everything on my skin.

After I cleansed my face, I use a toner, the one that I’ve been using for a while now is the “Fresh Rose Floral Toner,” I spray the product directly to my face and then gently massage it with my hands until

my skin absorbs it, this product leaves my skin very smooth.

Moving on to serum, my favorite serum is the “Elizavecca Witch Piggy Hell Pore Control” I use it on my morning and night routine. This serum helps to reduce pores and it is good before you apply your makeup because it won't go too deep in the pores.

Once the serum has been absorbed, I put on a face mask I prefer to use sheet masks because you just put it on your face and wait 15 to take it off. The sheet mask that I use is the “Mizon Joyful Time Essence Mask” this is a hydrating mask that will make your skin softer. Under the mask I put a hydrogel eye

patch, my favorite one is the “Koelf Ruby Bulgarian Rose,” these patches helped me to get rid of the dark circles under my eyes. I leave both the eye patches and the sheet mask for 15 minutes on my skin.

Next, I apply moisturizer, I prefer to use water-based moisturizer because it leaves a refreshing sensation on my skin. The one that I use is the “Nature Republic Soothing and Moisture Gel” it has 92% present of Aloe Vera which helps to hydrate your skin.

The last step of my routine is to apply a sleeping eye mask and a sleeping lip mask. Both products are from the brand Laneige and they help to keep these areas hydrated throughout the night.

This skincare routine has helped my skin a lot, I don't have that many pimples on my face and also my skin feels very soft. If you would like to try any of these products I will try to leave the links so that you can get them.

## My makeup routine.

Hello everyone! Today I'm going to be showing the makeup products that I use every day. My makeup is typically based on the makeup-no makeup look because it is more convenient for the morning; it only takes me about 10 minutes to get ready.

The first product that I use is sunscreen protector. I use the "Hawaiian Tropic Silk Hydration." This step is important because the UV rays can have a negative effect on our skin over time.

While my skin absorbs the sunscreen protector, I curl my lashes and apply mascara. The mascara that I typically use is the "Too Faced Better than sex," it adds volume and makes my lashes look longer.

After mascara, I move on to my eyebrows. The product I use is the "Benefit Precisely, My Brow Pencil." I use it on the shade 4.5. Personally, I don't do anything too fancy to it because I don't know how to shape my brows, so I just fill the spots where there is not much hair.

Once I'm done with mascara and eyebrows, I apply foundation and concealer. The foundation that I've been using for a year now is the "Milk Makeup Sunshine Skin Tint." It has SPF 30 which adds more protection from the UV rays and is also very lightweight on your skin. The concealer that I use is the "L.A. Girl Pro-Conceal;" it is a bit heavier than the foundation but it covers my pimples very well and also my under eyes.

When I'm done with foundation and

concealer, I apply blush. The blush that I use is the "INC. Redible blush" on the color "my first love," you have to be careful when applying it because

it is very pigmented and you don't want to apply too much on your cheeks.

After blush, I apply translucent powder all over my face. I use the "Ohii glass powder," this powder lets my foundation and concealer not melt throughout the day.

The last step is my lips. I like to use lip tints because they stay on my lips for a long time and my favourite lip tint is the "Etude House Matte Chic Lip Lacquer" it literally stays on my lips for the entire day and my favourite tone is Burgundy Seulgi. It is a dark red and I only apply it on the center of my lips and blend it so that it gives me that ombre lips look.

Those are the products that I use for my daily routine; you can personalize it to your needs but if you like the makeup-no makeup look, this is an option that you can follow.

## My favourite lip tints.

There are different types of lip products in the market, but I prefer to get lip tints rather than a lip gloss or a lipstick because they stay on the lips longer. In this article, I will show you what my favorite lip tints are and where I got them from.

The first lip tint is the "Colorgram:TOK Glow Pop Tint," the color that I like is the number 04 Coral Wish. This tint has more of a gloss consistency but it still stains the lips very well and stays there for a few hours. You can get this lip tint on the website of CelebShop; they have all of the Colorgram:TOK collection there.

The next lip tint is the "IM MEME Tic Toc Lip Tint," on the color 009 Barely Ruby. What I like about this lip tint is that it leaves a velvety finish on the lips, making them look smooth and pretty. The only thing that I would say I don't like about it is that it only stays on the lips for a couple of hours. This lip tint, as well as the next one, can be found on the Yesstyle website.

The last lip tint that I recommend is the "Etude House Matte Chic Lip Lacquer" my favorite tone is Burgundy Seulgi. As the name mentions, this lip tint is matte lip tint, but I like to add a clear lip gloss on top to give it a glossy effect.

The way that I apply these lip tints is on the center of my lips, and then I blend it to give that ombre lips look. I strongly recommend you these lip tints because they will add a plus to your makeup look.
